THE PRACTICAL AUDIO RECORDING COURSE

Course Description and Registration Information

This 10-week program is an 10 week course given one class per week from 6-9PM focusing on today's studio recording technology, techniques, terminology, hardware and software. Designed primarily for musicians, artists and home recording enthusiasts, PARC has also been popular with DJs and just about anyone interested in sound production and recording. The course is offered at Mirror Sound Studio's revamped state of the art Shoreline facility. With a history of over 3 decades of teaching recording classes, students find Parc's small class size comfortable and enjoyable. Small classes (limited to 6 students per class), gives each student maximum attention and "Hands-On Training" time. Another feature of PARC are student in-class projects and mix on your DAW homework. Working with your own music and later evaluating your mix at home is a great way to sharpen your skills and set new goals for yourself. Parc presents recording fundamentals in a easy to understand way. Parc's curriculum is outlined below. Our text *The Recording Engineer's Handbook* by Bobby Owsinski is available online at Amazon. A certificate of achievement is awarded to each student upon successful completion of the 10 classes (30 class hours) and all course exams.

Date: 1 Thurs. evening per week for 10 weeks from 6-9pm. Allow for a possible 1 week recess during your class (11 weeks total).

Text: Bobby Owsinski *The Recording Engineer's Handbook* \$55.

Tuition: \$1000 (payment plan available) Call now to secure your reservation for the next course, \$250 deposit required. Checks, cash or money orders accepted. Sorry, no makeup's or tuition refunds for missed classes.
